DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 25-28 are rejected under 35 U.S.C. 112, first paragraph, as based on a disclosure which is not enabling. A level control valve that closes a bypass passage between the outlet valve and the separator chamber in response to a predetermined pressure differential between liquid increased in pressure by the pump and liquid within the separator chamber, which is critical or essential to the practice of the invention, but not included in the claim is not enabled by the disclosure. See *In re Mayhew*, 527 F.2d 1229, 188 USPQ 356 (CCPA 1976). Examiner notes page 3 paragraph [15] of the specification which recites "The liquid 52 exits through a liquid outlet valve 58 into a high-pressure storage container 100. Because the storage container 100 is at a greater pressure than the incoming liquid/gas mixture 48, the pressure of the liquid 52 must be raised before exiting the separator assembly 10. The separator assembly 10 includes a level control valve 40 and a pump 62 to achieve the required increased pressure of exiting liquid 52". Therefore, because the specification and drawings recite that a level control valve is a required element for proper function of the separator assembly, the limitations to a level control valve that closes a bypass passage between the outlet valve and the separator chamber in response to a predetermined pressure differential between liquid increased in pressure by the pump and liquid within the separator

chamber must be included in new claim 25. Examiner also notes that if claim 25 were amended to include the above recited limitations, a possible double patenting situation would arise with claim 1, therefore if claim 25 is amended, the amendment should include further limitations in order to prevent a possible double patenting situation. Claims 26-28 depend on claim 25 and hence are also rejected.

Allowable Subject Matter

Claims 1,3-22, and 24 are allowed.

The following is a statement of reasons for the indication of allowable subject matter:

Claims 1, 10, and 15 include subject matter which was indicated as being allowable in the previous office action. Claims 3-9 depend on claim 1 and hence are also allowed. Claims 11-14 depend on claim 10 and hence are also allowed. Claims 16-22 and 24 depend on claim 15 and hence are also allowed.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any

extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
